**Decision Making Algorithms for Hydro-Power Plant Location (SpringerBriefs in Energy)** Mrinmoy Majumder, Soumya Ghosh

The present study has attempted to apply the advantage of neuro-genetic algorithms for optimal decision making in maximum utilization of natural resources. Hydro-power is one of the inexpensive, but a reliable source of alternative energy which is foreseen as the possible answer to the present crisis in the energy sector. However, the major problem related to hydro-energy is its dependency on location. An ideal location can produce maximum energy with minimum loss. Besides, such power-plant also requires substantial amount of land which is a precious resource nowadays due to the rapid and uncontrolled urbanization observed in most of the urban centres in the World. The feasibility of such plants also depends on social acceptance as well as the level of environmental casualty and economic benefit, all of which is also spatially dependent. Decision making algorithms are applied to identify better solution if a problem has more than one alternative explication. Nature based algorithms are found to be efficient enough to catalyze such kind of decision making analysis. That is why the present study tries to utilize nature based algorithms to solve the problems of location selection for hydropower plants. The study employed six different types of nature based algorithms to select one of the locations among many available for installation of hydropower plant in the North Eastern part of the Indian subcontinent. The locations are selected based on their in stream resources and included in the decision making as alternatives. A methodology of criteria selection, determination of weightage and applications of bioinspired algorithms are adopted to produce utmost exertion of the available natural resources with minimum hostility and wastage of the same.

### **From reader reviews:**

#### **Thelma Price:**

Hey guys, do you wish to find a new book to read? Maybe the book with the subject Decision Making Algorithms for Hydro-Power Plant Location (SpringerBriefs in Energy) suitable to you? The book was written by a well-known writer in this era. Typically the book titled Decision Making Algorithms for Hydro-Power Plant Location (SpringerBriefs in Energy) is the main of several books that everyone reads now. This book was inspired a number of people in the world. When you read this guide you will enter the new dimensions that you ever knew just before. The author explained their thought in a simple way, thus all of people can easily comprehend the core of this publication. This book will give you a lot of information about this world now. So you can see the representation of the world within this book.

#### **Anderson Austin:**

Decision Making Algorithms for Hydro-Power Plant Location (SpringerBriefs in Energy) can be one of your beginner books that are a good idea. Most of us recommend that straight away because this e-book has good vocabulary that may increase your knowledge in vocab, easy to understand, bit entertaining but nonetheless delivering the information. The writer giving his/her effort that will put every word into satisfaction arrangement in writing Decision Making Algorithms for Hydro-Power Plant Location (SpringerBriefs in Energy) but doesn't forget the main place, giving the reader the hottest as well as based confirm resource info that maybe you can be among it. This great information can easily draw you into a fresh stage of crucial contemplating.

#### **Stephen Ross:**

This Decision Making Algorithms for Hydro-Power Plant Location (SpringerBriefs in Energy) is a great e-book for you because the content that is certainly full of information for you who always deal with the world and have to make a decision every minute. This particular book reveals its details accurately using great coordinate words or we can say no rambling sentences in it. So if you are reading it hurriedly you can have the whole facts in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with beautiful delivering sentences. Having Decision Making Algorithms for Hydro-Power Plant Location (SpringerBriefs in Energy) in your hand like getting the world in your arm, details in it is not a ridiculous one. We can say that no reserve that offer you the world in ten or fifteen small rights but this e-book already does that. So, this can be a good reading book. Heya Mr. and Mrs. hectic do you still doubt that?

#### **Terrance Pitt:**

As we know that a book is an important thing to add our information for everything. By a book we can know everything we would like. A book is a group of written, printed, illustrated or blank sheets. Every year has been exactly added. This guide Decision Making Algorithms for Hydro-Power Plant Location (SpringerBriefs in Energy) was filled in relation to science. Spend your time to add your knowledge about

your research competence. Some people has various feel when they reading a new book. If you know how big selling point of a book, you can really feel enjoy to read a publication. In the modern era like now, many ways to get book which you wanted.
