Peer-to-Peer Computing: Applications, Architecture, Protocols, and Challenges (Chapman & Hall/CRC Computational Science) Yu-Kwong Ricky Kwok

While people are now using peer-to-peer (P2P) applications for various processes, such as file sharing and video streaming, many research and engineering issues still need to be tackled in order to further advance P2P technologies. **Peer-to-Peer Computing: Applications, Architecture, Protocols, and Challenges** provides comprehensive theoretical and practical coverage of the major features of contemporary P2P systems and examines the obstacles to further success.

Setting the stage for understanding important research issues in P2P systems, the book first introduces various P2P network architectures. It then details the topology control research problem as well as existing technologies for handling topology control issues. The author describes novel and interesting incentive schemes for enticing peers to cooperate and explores recent innovations on trust issues. He also examines security problems in a P2P network. The final chapter addresses the future of the field. Throughout the text, the highly popular P2P IPTV application, PPLive, is used as a case study to illustrate the practical aspects of the concepts covered.

Addressing the unique challenges of P2P systems, this book presents practical applications of recent theoretical results in P2P computing. It also stimulates further research on critical issues, including performance and security problems.

From reader reviews:

Arthur West:

Do you one among people who can't read pleasant if the sentence chained from the straightway, hold on guys that aren't like that. This Peer-to-Peer Computing: Applications, Architecture, Protocols, and Challenges (Chapman & Hall/CRC Computational Science) book is readable simply by you who hate those straight word style. You will find the facts here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to supply to you. The writer of Peer-to-Peer Computing: Applications, Architecture, Protocols, and Challenges (Chapman & Hall/CRC Computational Science) content conveys the thought easily to understand by lots of people. The printed and e-book are not different in the content but it just different by means of it. So , do you nonetheless thinking Peer-to-Peer Computing: Applications, Architecture, Protocols, and Challenges (Chapman & Hall/CRC Computational Science) is not loveable to be your top listing reading book?

Shirley Glover:

Playing with family inside a park, coming to see the ocean world or hanging out with friends is thing that usually you have done when you have spare time, in that case why you don't try issue that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Peer-to-Peer Computing: Applications, Architecture, Protocols, and Challenges (Chapman & Hall/CRC Computational Science), you may enjoy both. It is good combination right, you still need to miss it? What kind of hang-out type is it? Oh occur its mind hangout people. What? Still don't understand it, oh come on its called reading friends.

Esther Ponce:

Reading a book being new life style in this yr; every people loves to go through a book. When you learn a book you can get a large amount of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your research, you can read education books, but if you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, and also soon. The Peer-to-Peer Computing: Applications, Architecture, Protocols, and Challenges (Chapman & Hall/CRC Computational Science) provide you with a new experience in looking at a book.

Andrew Nixon:

With this era which is the greater particular person or who has ability in doing something more are more treasured than other. Do you want to become one of it? It is just simple solution to have that. What you have to do is just spending your time not much but quite enough to get a look at some books. Among the books in the top checklist in your reading list is Peer-to-Peer Computing: Applications, Architecture, Protocols, and Challenges (Chapman & Hall/CRC Computational Science). This book that is certainly qualified as The

Hungry Slopes can get you closer in growing to be precious person. By looking upwards and review this reserve you can get many advantages.
