## Space-Time Processing for MIMO Communications

Driven by the desire to boost the quality of service of wireless systems closer to that afforded by wireline systems, space-time processing for multiple-input multiple-output (MIMO) wireless communications research has drawn remarkable interest in recent years. Exciting theoretical advances have been complemented by rapid transition of research results to industry products and services, thus creating a vibrant new area.

Space-time processing is a broad area, owing in part to the underlying convergence of information theory, communications and signal processing research that brought it to fruition. This book presents a balanced and timely introduction to space-time processing for MIMO communications, including highlights of emerging trends, such as spatial multiplexing and joint transceiver optimization.

- Includes detailed coverage of wireless channel sounding, modelling, characterization and model validation.
- Provides state-of-the-art research results on space-time coding, including comprehensive tutorial coverage of orthogonal space-time block codes.
- Discusses important recent developments in spatial multiplexing, transmit beam-forming, pre-coding and joint transceiver design for the multi-user MIMO downlink using full or partial CSI.
- Illustrates all theory with numerous examples gleaned from cutting-edge research from around the globe.

This valuable resource will appeal to engineers, developers and consultants involved in the design and implementation of space-time processing for MIMO communications. Its accessible format, amply illustrated with real world case studies, contains relevant, detailed advice for postgraduate students and researchers specializing in this field.

### From reader reviews:

#### **Johanna Garrett:**

Book is to be different for each grade. Book for children until eventually adult are different content. To be sure that book is very important for us. The book Space-Time Processing for MIMO Communications had been making you to know about other knowledge and of course you can take more information. It is rather advantages for you. The book Space-Time Processing for MIMO Communications is not only giving you much more new information but also being your friend when you experience bored. You can spend your spend time to read your reserve. Try to make relationship together with the book Space-Time Processing for MIMO Communications. You never truly feel lose out for everything when you read some books.

#### **Beverly McKeever:**

Nowadays reading books be than want or need but also turn into a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The details you get based on what kind of reserve you read, if you want send more knowledge just go with training books but if you want feel happy read one along with theme for entertaining for example comic or novel. The actual Space-Time Processing for MIMO Communications is kind of book which is giving the reader unforeseen experience.

#### **Hector Duggan:**

Information is provisions for anyone to get better life, information these days can get by anyone in everywhere. The information can be a expertise or any news even an issue. What people must be consider any time those information which is within the former life are difficult to be find than now is taking seriously which one is suitable to believe or which one often the resource are convinced. If you find the unstable resource then you buy it as your main information you will have huge disadvantage for you. All those possibilities will not happen throughout you if you take Space-Time Processing for MIMO Communications as your daily resource information.

#### **Joaquin Bedard:**

Reading a book to be new life style in this season; every people loves to learn a book. When you read a book you can get a great deal of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what types of book that you have read. In order to get information about your analysis, you can read education books, but if you want to entertain yourself look for a fiction books, this kind of us novel, comics, as well as soon. The Space-Time Processing for MIMO Communications will give you a new experience in reading a book.
