## Colloid and Interface Chemistry for Nanotechnology (Progress in Colloid and Interface Science)

Colloid and interface science dealt with nanoscale objects for nearly a century before the term *nanotechnology* was coined. An interdisciplinary field, it bridges the macroscopic world and the small world of atoms and molecules. **Colloid and Interface Chemistry for Nanotechnology** is a collection of manuscripts reflecting the activities of research teams that have been involved in the networking project *Colloid and Interface Chemistry for Nanotechnology* (2006–2011), Action D43, the European Science Foundation. The project was a part of the intergovernmental framework for Cooperation in Science and Technology (COST), allowing the coordination of nationally funded research across Europe.

With contributions by leading experts, this book covers a wide range of topics. Chapters are grouped into three sections: "Nanoparticle Synthesis and Characterization," "New Experimental Tools and Interpretation," and "Nanocolloidal Dispersions and Interfaces." The topics covered belong to six basic research areas: (1) The synthesis of nanostructured materials of well-defined size and function; (2) Analytical methods and tools for control and characterization of synthesized nanomaterials; (3) Self-assembly of nanomaterials, such as microemulsions and micelles, and their applications; (4) Bioinspired nanostructured materials—structure, properties, and applications; (5) Design of active, soft functional interfaces with unique properties for sensors, catalysts, and biomedical assays; and (6) Nanoscale elements in soft nanoscale devices for applications in analytical and biomedical sciences.

This book describes highlights in nanotechnology based on state-of-the-art principles in colloid and interface science, demonstrating how great progress in the various branches of nanotechnology can be achieved. The application of these principles allows for the development of new experimental and theoretical tools.

### **From reader reviews:**

#### **Mary Davis:**

Do you have favorite book? Should you have, what is your favorite's book? Guide is very important thing for us to learn everything in the world. Each publication has different aim or even goal; it means that e-book has different type. Some people really feel enjoy to spend their a chance to read a book. They are really reading whatever they consider because their hobby is definitely reading a book. Why not the person who don't like examining a book? Sometime, man or woman feel need book whenever they found difficult problem or perhaps exercise. Well, probably you will require this Colloid and Interface Chemistry for Nanotechnology (Progress in Colloid and Interface Science).

#### **Richard Osteen:**

People live in this new moment of lifestyle always try to and must have the spare time or they will get great deal of stress from both daily life and work. So , whenever we ask do people have free time, we will say absolutely yes. People is human not really a robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to an individual of course your answer will unlimited right. Then do you ever try this one, reading books. It can be your alternative within spending your spare time, the book you have read is actually Colloid and Interface Chemistry for Nanotechnology (Progress in Colloid and Interface Science).

#### **Ashley Johnson:**

Playing with family in a very park, coming to see the water world or hanging out with close friends is thing that usually you could have done when you have spare time, in that case why you don't try issue that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Colloid and Interface Chemistry for Nanotechnology (Progress in Colloid and Interface Science), you can enjoy both. It is very good combination right, you still need to miss it? What kind of hang type is it? Oh can happen its mind hangout men. What? Still don't get it, oh come on its known as reading friends.

#### **Ian Sharpless:**

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you never know the inside because don't evaluate book by its cover may doesn't work this is difficult job because you are afraid that the inside maybe not because fantastic as in the outside search likes. Maybe you answer might be Colloid and Interface Chemistry for Nanotechnology (Progress in Colloid and Interface Science) why because the excellent cover that make you consider about the content will not disappoint you. The inside or content is actually fantastic as the outside or even cover. Your reading sixth sense will directly show you to pick up this book.
