**Business Component-Based Software Engineering (The Springer International Series in Engineering and Computer Science)** Franck Barbier

**Business Component-Based Software Engineering**, an edited volume, aims to complement some other reputable books on CBSE, by stressing how components are built for large-scale applications, within dedicated development processes and for easy and direct combination. This book will emphasize these three facets and will offer a complete overview of some recent progresses. Projects and works explained herein will prompt graduate students, academics, software engineers, project managers and developers to adopt and to apply new component development methods gained from and validated by the authors. The authors of **Business Component-Based Software Engineering** are academic and professionals, experts in the field, who will introduce the state of the art on CBSE from their shared experience by working on the same projects.

**Business Component-Based Software Engineering** is designed to meet the needs of practitioners and researchers in industry, and graduate-level students in Computer Science and Engineering.
