## Novel Materials for Carbon Dioxide Mitigation Technology

*Materials for Carbon Dioxide Mitigation Technology* offers expert insight and experience from recognized authorities in advanced material development in carbon mitigation technology and constitutes a comprehensive guide to the selection and design of a wide range of solvent/sorbent/catalyst used by scientists globally. It appeals to chemical scientists, material scientists and engineers, energy researchers, and environmental scientists from academia, industry, and government in their research directed toward greener, more efficient carbon mitigation processes.

- Emphasizes material development for carbon mitigation technologies rather than regulations
- Provides a fundamental understanding of the underpinning science as well as technological approaches to implement carbon capture, utilization and storage technologies.
- Introduces the driving force behind novel materials, their performance and applications for carbon dioxide mitigation
- Contains figures, tables and an abundance of examples clearly explaining the development, characterization and evaluation of novel carbon mitigation materials
- Includes hundreds of citations drawing on the most recent published works on the subject
- Provides a wealth of real-world examples, illustrating how to bridge nano-scale materials to bulk carbon mitigation properties.

### From reader reviews:

#### **Dorothy Pearce:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite guide and reading a guide. Beside you can solve your condition; you can add your knowledge by the guide entitled Novel Materials for Carbon Dioxide Mitigation Technology. Try to the actual book Novel Materials for Carbon Dioxide Mitigation Technology as your friend. It means that it can being your friend when you experience alone and beside associated with course make you smarter than ever. Yeah, it is very fortunated to suit your needs. The book makes you far more confidence because you can know every thing by the book. So , we need to make new experience and knowledge with this book.

The knowledge you get based on what kind of guide you read, if you want have more knowledge just go with knowledge books but if you want sense happy read one with theme for entertaining for instance comic or novel. The Novel Materials for Carbon Dioxide Mitigation Technology is kind of reserve which is giving the reader unpredictable experience.

#### **Ryan Harrison:**

Exactly why? Because this Novel Materials for Carbon Dioxide Mitigation Technology is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will jolt you with the secret that inside. Reading this book beside it was fantastic author who all write the book in such remarkable way makes the content inside easier to understand, entertaining means but still convey the meaning thoroughly.
