Networking for Big Data (Chapman & Hall/CRC Big Data Series)

Networking for Big Data (Chapman & Hall/CRC Big Data Series)

Networking for Big Data supplies an unprecedented look at cutting-edge research on the networking and communication aspects of Big Data. Starting with a comprehensive introduction to Big Data and its networking issues, it offers deep technical coverage of both theory and applications.

The book is divided into four sections: introduction to Big Data, networking theory and design for Big Data, networking security for Big Data, and platforms and systems for Big Data applications. Focusing on key networking issues in Big Data, the book explains network design and implementation for Big Data. It examines how network topology impacts data collection and explores Big Data storage and resource management.

- Addresses the virtual machine placement problem
- Describes widespread network and information security technologies for Big Data
- Explores network configuration and flow scheduling for Big Data applications
- Presents a systematic set of techniques that optimize throughput and improve bandwidth for efficient Big Data transfer on the Internet
- Tackles the trade-off problem between energy efficiency and service resiliency

The book covers distributed Big Data storage and retrieval as well as security, trust, and privacy protection for Big Data collection, storage, and search. It discusses the use of cloud infrastructures and highlights its benefits to overcome the identified issues and to provide new approaches for managing huge volumes of heterogeneous data.

The text concludes by proposing an innovative user data profile-aware policy-based network management framework that can help you exploit and differentiate user data profiles to achieve better power efficiency and optimized resource management.

From reader reviews:

Martha Wilson:

Do you have favorite book? Should you have, what is your favorite's book? Reserve is very important thing for us to find out everything in the world. Each guide has different aim or maybe goal; it means that reserve has different type. Some people experience enjoy to spend their time to read a book. They may be reading whatever they get because their hobby is definitely reading a book. Why not the person who don't like examining a book? Sometime, man feel need book if they found difficult problem or even exercise. Well, probably you will require this Networking for Big Data (Chapman & Hall/CRC Big Data Series).

Alma Saunders:

Reading can called brain hangout, why? Because while you are reading a book especially book entitled Networking for Big Data (Chapman & Hall/CRC Big Data Series) your thoughts will drift away trough every dimension, wandering in most aspect that maybe mysterious for but surely will end up your mind friends. Imaging each and every word written in a publication then become one application form conclusion and explanation that maybe you never get just before. The Networking for Big Data (Chapman & Hall/CRC Big Data Series) giving you another experience more than blown away your thoughts but also giving you useful info for your better life on this era. So now let us present to you the relaxing pattern here is your body and mind will likely be pleased when you are finished reading through it, like winning a sport. Do you want to try this extraordinary wasting spare time activity?

Mark Malek:

Your reading 6th sense will not betray you, why because this Networking for Big Data (Chapman & Hall/CRC Big Data Series) book written by well-known writer we are excited for well how to make book that could be understand by anyone who also read the book. Written inside good manner for you, dripping every ideas and creating skill only for eliminate your personal hunger then you still uncertainty Networking for Big Data (Chapman & Hall/CRC Big Data Series) as good book not only by the cover but also from the content. This is one guide that can break don't assess book by its cover, so do you still needing yet another sixth sense to pick that!? Oh come on your reading sixth sense already said so why you have to listening to yet another sixth sense.

Rebecca Muldoon:

This Networking for Big Data (Chapman & Hall/CRC Big Data Series) is great e-book for you because the content which is full of information for you who all always deal with world and get to make decision every minute. That book reveal it info accurately using great arrange word or we can state no rambling sentences included. So if you are read the item hurriedly you can have whole details in it. Doesn't mean it only will give you straight forward sentences but tough core information with lovely delivering sentences. Having Networking for Big Data (Chapman & Hall/CRC Big Data Series) in your hand like keeping the world in your arm, data in it is not ridiculous 1. We can say that no reserve that offer you world in ten or fifteen tiny

right but this guide already do that. So , this really is good reading book. Hey there Mr. and Mrs. hectic do you still doubt that?
