Digital Fabrication in Architecture, Engineering and Construction Luca Caneparo

Digital technologies are changing the relationship between design and construction: with computer models, CAD/CAM, and prototyping, designers can gain direct control of building and construction processes. The ability to digitally model designs, and thus to use those models directly in the context of production, creates a synthesis between design and construction in keeping with the tradition of the close relationship between design and craftsmanship, between the quality of the design and the rules of the craft.

The evolution of the culture of design and construction is the underlying theme of this book. The aim is to discuss the direction that innovation is now taking, with a particular focus on today's cutting-edge architectures. The method addresses the ways in which different societies have dealt with the issues of their age regarding design and construction, the different contributions provided by various techniques, and with them the meanings expressed by the architecture.

As building design using digital tools requires specific skills in the fabrication processes and in the languages used by information technology, the book also offers a practical guide to new methods and techniques of managing and controlling fabrication for AEC. A systematic analysis of new skills used in the design process presents an overview of opportunities for architects and engineers.

By collecting information on significant projects and analyzing them, the book explores the technical and artistic potential of digital technology. The cases studied are the outcomes of groundbreaking projects which were able to give form and significance to technological research. They show that digital tools are not the exclusive prerogative of large firms but can also be adopted by teams working across small and medium-sized firms – firms which have been able to use informed research to link innovative design with the possibilities offered by digital fabrication in architecture.

From reader reviews:

Toni Bays:

Do you one of people who can't read pleasurable if the sentence chained from the straightway, hold on guys this kind of aren't like that. This Digital Fabrication in Architecture, Engineering and Construction book is readable through you who hate the straight word style. You will find the facts here are arrange for enjoyable looking at experience without leaving also decrease the knowledge that want to supply to you. The writer regarding Digital Fabrication in Architecture, Engineering and Construction content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the information but it just different in the form of it. So , do you still thinking Digital Fabrication in Architecture, Engineering and Construction is not loveable to be your top record reading book?

Sheila Cyr:

As we know that book is important thing to add our understanding for everything. By a reserve we can know everything we want. A book is a set of written, printed, illustrated or even blank sheet. Every year was exactly added. This guide Digital Fabrication in Architecture, Engineering and Construction was filled regarding science. Spend your spare time to add your knowledge about your technology competence. Some people has several feel when they reading a book. If you know how big benefit from a book, you can sense enjoy to read a book. In the modern era like at this point, many ways to get book which you wanted.

Jose Said:

Do you like reading a book? Confuse to looking for your chosen book? Or your book ended up being rare? Why so many issue for the book? But just about any people feel that they enjoy regarding reading. Some people likes examining, not only science book but also novel and Digital Fabrication in Architecture, Engineering and Construction or others sources were given know-how for you. After you know how the truly amazing a book, you feel desire to read more and more. Science e-book was created for teacher or maybe students especially. Those books are helping them to add their knowledge. In different case, beside science guide, any other book likes Digital Fabrication in Architecture, Engineering and Construction to make your spare time more colorful. Many types of book like here.

David Wade:

Reading a book make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is created or printed or created from each source this filled update of news. On this modern era like today, many ways to get information are available for you. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or just seeking the Digital Fabrication in Architecture, Engineering and Construction when you essential it?
