TransEvolution: The Coming Age of Human Deconstruction Daniel Estulin

Arguing that the race to better humankind is about to go to a new dimension as a result of a nanotechnological revolution, this enthralling read purports that the depth of progress and technological development is such that people in the very near future may no longer be fully human. *TransEvolution* discusses the transition from human to someone—or something—new and different and the increasing trend of implementing prosthetics, organ implants, bionic eyes, hearing aids, and other technological augmentations. Humans are capable of doing things they never imagined would be possible 20 years ago, and the rapid growth of this trend is nowhere near its end. But do the benefits of these advancements come with a price? Is humanity in danger because of this domination of science and technology? Bestselling author Daniel Estulin describes his vision of the future in which he believes the elite will employ their Promethean plans.
