Doing Conceptual History in Africa (Making Sense of History)

Employing an innovative methodological toolkit, *Doing Conceptual History in Africa* provides a refreshingly broad and interdisciplinary approach to African historical studies. The studies assembled here focus on the complex role of language in Africa's historical development, with a particular emphasis on pragmatics and semantics. From precolonial dynamics of wealth and poverty to the conceptual foundations of nationalist movements, each contribution strikes a balance between the local and the global, engaging with a distinctively African intellectual tradition while analyzing the regional and global contexts in which categories like "work," "marriage," and "land" take shape.
