- Learn about extension capabilities to extend the web script framework

In Detail

Alfresco web scripts is a key feature of the Alfresco enterprise content management system that enables other applications to interact with the Alfresco repository in a secure way. This book will help you understand everything you need to know about web scripts so that you can practically apply them to your own projects.

You will begin by learning the basics of Alfresco web scripts, giving you a clear idea about how web scripts are a useful solution to your business problems. Moving on, you will delve into the powerful web script framework and then get a complete walk-through of all the components required to build web scripts. Later in this book, you will discover various ways to execute web scripts. You will learn about useful JavaScript APIs in Alfresco that you can leverage when building business solutions with web scripts. Moving further, you will learn about deployment, debugging, and troubleshooting web scripts, and find instructions to develop web scripts in a Maven project that will help you learn how to build web scripts in a real development environment.
