Although the idea of the reflective practitioner is embraced by many, there is still a need to understand how teachers' practical experience and the theoretical insights of researchers can be linked in teacher education. This book offers a framework for addressing this problem. It brings together 15 years of experience in teacher education and research, based on Korthagen's concept of "realistic teacher education" which is well known in Europe and gaining interest in North America. Set up as a journey back and forth between practice and theory, this book is not only about linking them but models how it can be done, providing both practical solutions and research-based theoretical foundations. *Linking Practice and Theory: The Pedagogy of Realistic Teacher Education*:

- \* serves as a guidebook for teacher educators, with many practical ideas and guidelines;
- \* prepares the reader for a fundamental shift in thinking about teacher education; and
- \* uses an international perspective in analyzing real, practical experience in teacher education, in the Netherlands and in other countries.
