Community Quality-of-Life Indicators: Best Cases IV

Community Quality-of-Life Indicators: Best Cases IV

Community indicators projects are plentiful. These projects capture the quality of life in towns, cities, counties, metropolitan regions, and larger geographic regions. Community quality-of-life (QOL) indicators are increasingly being integrated into overall planning and other public policy activities. The community indicators project reports are used not only in monitoring and evaluation applications but also in the context of increasing citizen participation in guiding communities towards achieving desired goals. This is the fourth book in a series covering best practices in community QOL indicators. Each volume presents individual cases (chapters) of communities at the local or regional levels that have designed and implemented community indicators programs. In Volume IV, we present nine chapters from a variety of contexts: cities such as the City of Phoenix (Arizona, USA), Jacksonville (Florida, USA), and Bristol (UK), suburban communities areas such as Long Island (New York, USA) and Sydney (Australia), larger regions such as Vancouver (Canada), and townships such as Sobantu (South Africa).
