Il motore ad acqua (Italian Edition) Ares Van Jaag

Il motore ad acqua è un'invenzione che sfortunatamente è stata "inventata" molte volte.

L'idrogeno proveniente dall'acqua è molto abbondante, è rinnovabile e può essere utilizzato sia nei Paesi con scarse risorse energetiche sia in quelli che ne dispongono in abbondanza. Il petrolio crudo e il gas naturale sono invece risorse energetiche limitate.

Ma sono molte le persone che pensano che determinate tecnologie promettenti siano state soppresse da vari poteri politici o economici, generalmente allo scopo di proteggere i loro investimenti e interessi e, ai livelli più estremi e assurdi dell'illogicità cospirativa, per motivazioni sinistre di portata ancora maggiore.

In questa nuova opera, il versatile compositore e scrittore Van Jaag ci accompagna in un appassionante viaggio attraverso la storia di questa invenzione sconosciuta e dei suoi denigrati inventori.
