Materials in Sports Equipment: 1

Materials in Sports Equipment: 1

Improvements in materials technology have made a significant impact on sporting performance in recent years. Advanced materials and novel processing methods have enabled the development of new types of equipment with enhanced properties, as well as improving the overall design of sporting goods. The interdependence between material technology and design, and its impact on many of the most popular sports, is reviewed in this book.

Materials in sports equipment presents the latest research, from a distinguished panel of international contributors, into the chemical structure and composition, microstructure and material processing of the various materials used in a wide range of sports. The relationship between performance and design is examined in detail for each sport covered.

Part one concentrates on the general use of materials in sports. Here, the reader is given a broad insight into the overall influence of materials in sports, and the significance of material processing and design. Part two focuses on showing how individual sports have benefited from recent improvements in material technology. It also analyses the way in which improvements in our understanding of biomechanics and the engineering aspects of sports equipment performance have influenced materials and design. Sports whose equipment is considered in detail include: golf, tennis, cycling, mountaineering, skiing, cricket and paralympic sports. The overall aim of the book is to make the reader aware of the interaction between the type of material, its selection, processing and surface treatment, and show how this process underpins the performance of the final sporting product.

It is essential reading for all materials scientists and researchers working in this rapidly developing field.

- A major handbook on materials in sports
- Practical guide to material selection and processing for equipment used in many popular sports
- Shows how material characteristics affect design and performance

From reader reviews:

Megan Snyder:

What do you regarding book? It is not important along with you? Or just adding material when you need something to explain what the ones you have problem? How about your extra time? Or are you busy person? If you don't have spare time to accomplish others business, it gives you the sense of being bored faster. And you have extra time? What did you do? Everybody has many questions above. They must answer that question since just their can do that. It said that about guide. Book is familiar on every person. Yes, it is correct. Because start from on jardín de infancia until university need this Materials in Sports Equipment: 1 to read.

Leonard Santiago:

Do you among people who can't read pleasurable if the sentence chained in the straightway, hold on guys this specific aren't like that. This Materials in Sports Equipment: 1 book is readable by means of you who hate the straight word style. You will find the details here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to give to you. The writer connected with Materials in Sports Equipment: 1 content conveys objective easily to understand by a lot of people. The printed and e-book are not different in the written content but it just different by means of it. So , do you continue to thinking Materials in Sports Equipment: 1 is not loveable to be your top collection reading book?

Sherry Duncan:

Reading a book being new life style in this yr; every people loves to read a book. When you learn a book you can get a large amount of benefit. When you read books, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what types of book that you have read. In order to get information about your examine, you can read education books, but if you act like you want to entertain yourself read a fiction books, these kinds of us novel, comics, along with soon. The Materials in Sports Equipment: 1 offer you a new experience in looking at a book.

Paulette Preston:

With this era which is the greater man or woman or who has ability to do something more are more precious than other. Do you want to become one of it? It is just simple approach to have that. What you need to do is just spending your time little but quite enough to possess a look at some books. Among the books in the top listing in your reading list is usually Materials in Sports Equipment: 1. This book which is qualified as The Hungry Slopes can get you closer in turning into precious person. By looking right up and review this book you can get many advantages.
