Millimeter Wave Communication Systems (IEEE Series on Digital & Mobile Communication) Kao-Cheng Huang, Zhaocheng Wang

The aim of this book is to present the modern design and analysis principles of millimeter-wave communication system for wireless devices and to give postgraduates and system professionals the design insights and challenges when integrating millimeter wave personal communication system. Millimeter wave communication system are going to play key roles in modern gigabit wireless communication area as millimeter-wave industrial standards from IEEE, European Computer Manufacturing Association (ECMA) and Wireless High Definition (Wireless HD) Group, are on their way to the market. The book will review up-to-date research results and utilize numerous design and analysis for the whole system covering from Millimeter wave frontend to digital signal processing in order to address major topics in a high speed wireless system.

This book emphasizes the importance and the requirements of high-gain antennas, low power transceiver, adaptive equalizer/modulation, channel coding and adaptive multi-user detection for gigabit wireless communications. In addition, the book will include the updated research literature and patents in the topics of transceivers, antennas, MIMO, channel capacity, coding, equalizer, Modem and multi-user detection. Finally the application of these antennas will be discussed in light of different forthcoming wireless standards at V-band and E-band.

From reader reviews:

Tom Scott:

In this 21st millennium, people become competitive in each and every way. By being competitive today, people have to do something to make all of them survive, being in the middle of the crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated that for a while is reading. Yep, by reading an e-book your ability to survive rises then having a chance to stay than others is high. To suit your needs who want to start reading the book, we give you this Millimeter Wave Communication Systems (IEEE Series on Digital & Mobile Communication) book as a starter and daily reading reserve. Why, because this book is usually more than just a book.

Nydia Kelly:

Information is a provision for individuals to get a better life, information today can be gotten by anyone everywhere. The information can be an understanding or any news even an issue. What people must consider when those informations which are inside the former life are challenging is to find them now, taking seriously which one is suitable to believe or which one often the resource are convinced. If you find an unstable resource then you have it as your main information there will be a huge disadvantage for you. All those possibilities will not happen within you if you take Millimeter Wave Communication Systems (IEEE Series on Digital & Mobile Communication) as the daily resource information.

Kathy Graves:

Typically the book Millimeter Wave Communication Systems (IEEE Series on Digital & Mobile Communication) will bring someone to the new experience of reading the book. The author's style to describe the idea is very unique. Should you try to find a new book to see, this book is very suitable to you. The book Millimeter Wave Communication Systems (IEEE Series on Digital & Mobile Communication) is much recommended to you to study. You can also get the e-book from the official web site, so you can more easily read the book.

Michael Kendig:

Playing with family in the park, coming to see the coastal world or hanging out with close friends is something that usually you have done when you have spare time, after that why you don't try something really opposite from that. One activity that makes you not experience tired but still relaxing, thrilling like on a roller coaster you already been ride on and with additional details. Even you love Millimeter Wave Communication Systems (IEEE Series on Digital & Mobile Communication), you are able to enjoy both. It is a great combination right, you still desire to miss it? What kind of hangout is it? Oh seriously it's mind hangout folks. What? Still don't get it, oh come on it's identified as reading friends.
