**Space Weather (Springer Praxis Books)** Volker Bothmer, Ioannis A. Daglis

The editors present a state-of-the-art overview on the Physics of Space Weather and its effects on technological and biological systems on the ground and in space. It opens with a general introduction on the subject, followed by a historical review on the major developments in the field of solar terrestrial relationships leading to its development into the up-to-date field of space weather. Specific emphasis is placed on the technological effects that have impacted society in the past century at times of major solar activity. Chapter 2 summarizes key milestones, starting from the base of solar observations with classic telescopes up to recent space observations and new mission developments with EUV and X-ray telescopes (e.g., STEREO), yielding an unprecedented view of the sun-earth system. Chapter 3 provides a scientific summary of the present understanding of the physics of the sun-earth system based on the latest results from spacecraft designed to observe the Sun, the interplanetary medium and geospace. Chapter 4 describes how the plasma and magnetic field structure of the earth's magnetosphere is impacted by the variation of the solar and interplanetary conditions, providing the necessary science and technology background for missions in low and near earth's orbit. Chapter 5 elaborates the physics of the layer of the earth's upper atmosphere that is the cause of disruptions in radio-wave communications and GPS (Global Positioning System) errors, which is of crucial importance for projects like Galileo. In Chapters 6-10, the impacts of technology used up to now in space, on earth and on life are reviewed.

### **From reader reviews:**

#### **William McNally:**

People live in this new morning of lifestyle always try and and must have the extra time or they will get great deal of stress from both daily life and work. So , when we ask do people have free time, we will say absolutely of course. People is human not only a robot. Then we question again, what kind of activity are there when the spare time coming to anyone of course your answer can unlimited right. Then do you try this one, reading textbooks. It can be your alternative throughout spending your spare time, the particular book you have read is Space Weather (Springer Praxis Books).

#### **Harry Keller:**

The book untitled Space Weather (Springer Praxis Books) contain a lot of information on the item. The writer explains the woman idea with easy means. The language is very clear to see all the people, so do definitely not worry, you can easy to read the item. The book was authored by famous author. The author gives you in the new era of literary works. You can read this book because you can please read on your smart phone, or gadget, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site in addition to order it. Have a nice examine.

#### **Clayton Bruce:**

As we know that book is important thing to add our understanding for everything. By a reserve we can know everything we would like. A book is a pair of written, printed, illustrated or blank sheet. Every year ended up being exactly added. This reserve Space Weather (Springer Praxis Books) was filled about science. Spend your extra time to add your knowledge about your technology competence. Some people has distinct feel when they reading a book. If you know how big benefit of a book, you can truly feel enjoy to read a guide. In the modern era like right now, many ways to get book which you wanted.

#### **Holly Walker:**

What is your hobby? Have you heard that question when you got learners? We believe that that question was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person including reading or as reading become their hobby. You must know that reading is very important and also book as to be the matter. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You find good news or update regarding something by book. Many kinds of books that can you go onto be your object. One of them is actually Space Weather (Springer Praxis Books).
