## Alternative Energy Technologies: An Introduction with Computer Simulations (Nano and Energy)

Gavin Buxton

Alternative energy sources are becoming increasingly important in a world striving for energy independence, clean air, and a reprieve from global warming. Solar cells, wind power, and biofuels are some of the competing alternative energy sources hoping to gain a foothold in our future energy mix, and the economic advantages of these technologies are continually increasing as costs are reduced and efficiencies increased.

Alternative Energy Technologies: An Introduction with Computer Simulations explores the science and engineering behind a number of emerging alternative energy technologies, including polymer solar cells, algae biofuels, and artificial leaves. It also addresses the environmental need for these technologies. However, unlike its predecessors, this book employs simple computer models implemented within spreadsheet environments to simulate different aspects of the alternative energy technologies and therefore teach the subject matter.

This unique approach:

- Provides a dual introduction to alternative energy technologies and computer simulation
- Elucidates the fundamental behaviors and complex interactions within the alternative energy systems
- Makes computer simulation straightforward and accessible to readers with no prior programming experience

Featuring investigative exercises that deepen understanding and inspire further research, **Alternative Energy Technologies: An Introduction with Computer Simulations** makes an ideal introductory textbook for undergraduate students and a valuable professional reference for experimental researchers.

### **From reader reviews:**

#### **Margaret Williams:**

Alternative Energy Technologies: An Introduction with Computer Simulations (Nano and Energy) can be one of your nice books that are good idea. All of us recommend that straight away because this publication has good vocabulary that may increase your knowledge in terminology, easy to understand, bit entertaining but delivering the information. The article writer giving his/her effort to get every word into pleasure arrangement in writing Alternative Energy Technologies: An Introduction with Computer Simulations (Nano and Energy) although doesn't forget the main stage, giving the reader the hottest and based confirm resource information that maybe you can be one of it. This great information could drawn you into brand new stage of crucial pondering.

#### **Ricky Dotson:**

Do you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you just dont know the inside because don't determine book by its include may doesn't work this is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside seem likes. Maybe you answer can be Alternative Energy Technologies: An Introduction with Computer Simulations (Nano and Energy) why because the fantastic cover that make you consider regarding the content will not disappoint a person. The inside or content is actually fantastic as the outside or perhaps cover. Your reading 6th sense will directly direct you to pick up this book.

#### **Dennis Sellers:**

Reading a book to be new life style in this yr; every people loves to read a book. When you read a book you can get a lots of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your study, you can read education books, but if you act like you want to entertain yourself read a fiction books, such us novel, comics, along with soon. The Alternative Energy Technologies: An Introduction with Computer Simulations (Nano and Energy) offer you a new experience in reading a book.

#### **Steven Delorme:**

That publication can make you to feel relax. This book Alternative Energy Technologies: An Introduction with Computer Simulations (Nano and Energy) was colourful and of course has pictures on the website. As we know that book Alternative Energy Technologies: An Introduction with Computer Simulations (Nano and Energy) has many kinds or variety. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and think that you are the character on there. So , not at all of book are usually make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading which.
