Fuel Cells: Current Technology Challenges and Future Research Needs Noriko Hikosaka Behling

Fuel Cells: Current Technology Challenges and Future Research Needs is a one-of-a-kind, definitive reference source for technical students, researchers, government policymakers, and business leaders. Here in a single volume is a thorough review of government, corporate, and research institutions' policies and programs related to fuel cell development, and the effects of those programs on the success or failure of fuel cell initiatives. The book describes specific, internal corporate and academic R&D activities, levels of investment, strategies for technology acquisition, and reasons for success and failure.

This volume provides an overview of past and present initiatives to improve and commercialize fuel cell technologies, as well as context and analysis to help potential investors assess current fuel cell commercialization activities and future prospects. Crucially, it also gives top executive policymakers and company presidents detailed policy recommendations on what should be done to successfully commercialize fuel cell technologies.

- Provides a clear and unbiased picture of current fuel cell research programs
- Outlines future research needs
- Offers concrete policy recommendations
