The Development of Self-Regulatory Mechanisms

The Development of Self-Regulatory Mechanisms

The Development of Self-Regulatory Mechanisms contains the papers presented at the conference on Early Childhood: The Development of Self-Regulatory Mechanisms, held at The Pennsylvania State University in January, 1970.

The theme of the conference is divided into four areas of interest: biological regulatory mechanisms, early self-regulatory behavior, thoughtful self-regulation, and models of human self-regulation. Papers focused on subjects on neurophysiological and neuroendocrinological regulatory mechanisms; infant cognitive development based on cardiac response and attention patterns; factors affecting communication abilities; and similarity of self-regulatory features of computer programs to human regulatory mechanisms. Psychologists, neurologists, physiologists, and endocrinologist will find the book invaluable.
