Topics in Modelling of Clustered Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability)

Topics in Modelling of Clustered Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability)

Many methods for analyzing clustered data exist, all with advantages and limitations in particular applications. Compiled from the contributions of leading specialists in the field, Topics in Modelling of Clustered Data describes the tools and techniques for modelling the clustered data often encountered in medical, biological, environmental, and social science studies. It focuses on providing a comprehensive treatment of marginal, conditional, and random effects models using, among others, likelihood, pseudo-likelihood, and generalized estimating equations methods.

The authors motivate and illustrate all aspects of these models in a variety of real applications. They discuss several variations and extensions, including individual-level covariates and combined continuous and discrete outcomes. Flexible modelling with fractional and local polynomials, omnibus lack-of-fit tests, robustification against misspecification, exact, and bootstrap inferential procedures all receive extensive treatment. The applications discussed center primarily, but not exclusively, on developmental toxicity, which leads naturally to discussion of other methodologies, including risk assessment and dose-response modelling.

Clearly written, Topics in Modelling of Clustered Data offers a practical, easily accessible survey of important modelling issues. Overview models give structure to a multitude of approaches, figures help readers visualize model characteristics, and a generous use of examples illustrates all aspects of the modelling process.

From reader reviews:

Michael Battle:

Why don't make it to become your habit? Right now, try to ready your time to do the important behave, like looking for your favorite book and reading a e-book. Beside you can solve your trouble; you can add your knowledge by the publication entitled Topics in Modelling of Clustered Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability). Try to make the book Topics in Modelling of Clustered Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) as your pal. It means that it can to be your friend when you feel alone and beside that of course make you smarter than ever. Yeah, it is very fortunated to suit your needs. The book makes you far more confidence because you can know every little thing by the book. So , let's make new experience in addition to knowledge with this book.

George Hartzell:

Hey guys, do you wishes to finds a new book to read? May be the book with the headline Topics in Modelling of Clustered Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) suitable to you? The particular book was written by popular writer in this era. The particular book untitled Topics in Modelling of Clustered Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability)is a single of several books in which everyone read now. This particular book was inspired lots of people in the world. When you read this guide you will enter the new shape that you ever know just before. The author explained their plan in the simple way, therefore all of people can easily to understand the core of this book. This book will give you a lots of information about this world now. To help you to see the represented of the world in this book.

Pauline Lipman:

A lot of people always spent their free time to vacation or go to the outside with them family or their friend. Were you aware? Many a lot of people spent they will free time just watching TV, or even playing video games all day long. If you want to try to find a new activity this is look different you can read any book. It is really fun in your case. If you enjoy the book which you read you can spent all day long to reading a guide. The book Topics in Modelling of Clustered Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) it is very good to read. There are a lot of those who recommended this book. These were enjoying reading this book. Should you did not have enough space to deliver this book you can buy the actual e-book. You can m0ore easily to read this book from a smart phone. The price is not too costly but this book possesses high quality.

Daisy Harris:

This Topics in Modelling of Clustered Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) is completely new way for you who has interest to look for some information mainly because it relief your hunger of information. Getting deeper you into it getting knowledge more you know or you who

still having tiny amount of digest in reading this Topics in Modelling of Clustered Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) can be the light food in your case because the information inside this book is easy to get by anyone. These books produce itself in the form that is reachable by anyone, yep I mean in the e-book web form. People who think that in e-book form make them feel sleepy even dizzy this publication is the answer. So there is no in reading a guide especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss the idea! Just read this e-book kind for your better life and also knowledge.
