Using Robots in Hazardous Environments: Landmine Detection, De-Mining and Other Applications

Using Robots in Hazardous Environments: Landmine Detection, De-Mining and Other Applications

There have been major recent advances in robotic systems that can replace humans in undertaking hazardous activities in demanding or dangerous environments. Published in association with the CLAWAR (Climbing and Walking Robots and Associated Technologies Association) (www.clawar.org), this important book reviews the development of robotic systems for de-mining and other risky activities such as fire-fighting.

Part one provides an overview of the use of robots for humanitarian de-mining work. Part two discusses the development of sensors for mine detection whilst Part three reviews developments in both teleoperated and autonomous robots. Building on the latter, Part four concentrates on robot autonomous navigation. The final part of the book reviews research on multi-agent-systems (MAS) and the multi-robotics-systems (MRS), promising tools that take into account modular design of mobile robots and the use of several robots in multi-task missions.

With its distinguished editors and international team of contributors, Using robots in hazardous environments: landmine detection, de-mining and other applications is a standard reference for all those researching the use of robots in hazardous environments as well as government and other agencies wishing to use robots for dangerous tasks such as landmine detection and disposal.

- Reviews the development of robotic systems for de-mining and other risky activities
- Discusses the development and applications of sensors for mine detection using different robotic systems
- Examines research on multi-agent-systems and multi-robotics systems

From reader reviews:

Esther Watson:

Now a day people that Living in the era wherever everything reachable by interact with the internet and the resources within it can be true or not need people to be aware of each info they get. How people have to be smart in having any information nowadays? Of course the reply is reading a book. Reading a book can help men and women out of this uncertainty Information particularly this Using Robots in Hazardous Environments: Landmine Detection, De-Mining and Other Applications book because book offers you rich facts and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it you probably know this.

Aubrey Newsome:

Reading a reserve can be one of a lot of activity that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new info. When you read a guide you will get new information due to the fact book is one of numerous ways to share the information or their idea. Second, reading a book will make you more imaginative. When you reading a book especially fiction book the author will bring you to imagine the story how the figures do it anything. Third, you can share your knowledge to other people. When you read this Using Robots in Hazardous Environments: Landmine Detection, De-Mining and Other Applications, you may tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the others, make them reading a reserve.

Mary Infante:

Playing with family inside a park, coming to see the marine world or hanging out with close friends is thing that usually you could have done when you have spare time, subsequently why you don't try issue that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Using Robots in Hazardous Environments: Landmine Detection, De-Mining and Other Applications, you are able to enjoy both. It is great combination right, you still want to miss it? What kind of hang type is it? Oh come on its mind hangout people. What? Still don't buy it, oh come on its named reading friends.

Trent Gibson:

Do you like reading a guide? Confuse to looking for your best book? Or your book has been rare? Why so many question for the book? But any kind of people feel that they enjoy regarding reading. Some people likes studying, not only science book but also novel and Using Robots in Hazardous Environments: Landmine Detection, De-Mining and Other Applications or maybe others sources were given expertise for you. After you know how the great a book, you feel want to read more and more. Science guide was created for teacher or maybe students especially. Those textbooks are helping them to put their knowledge. In different case, beside science book, any other book likes Using Robots in Hazardous Environments:

Landmine Detection, De-Mining and Other Applications to make your spare time considerably more colorful. Many types of book like here.
