Toward A Competitive Telecommunication Industry: Selected Papers From the 1994 Telecommunications Policy Research Conference (LEA Telecommunications Series)

Providing an authoritative perspective on the best current research regarding telecommunication policy, this book is based on the 22nd Annual Telecommunications Policy Research Conference. The papers focus on the critical policy issues created by increasing competition in the industry. The book contains a careful analysis of local competition and interconnection, international competition, universal service issues, the Internet and emerging new methods of communication, and the first amendment problems created by changing telecommunication technology.

It brings together -- in a convenient form -- a wide range of important scholarship on telecommunication policy that otherwise would require extensive research into a variety of journals, government filings, and unpublished papers.
